

Youssef Samir Refky

Full-Stack Software Engineer

Cairo, Egypt

+201095262732 — youssefrefky66@gmail.com — LinkedIn — GitHub

SUMMARY

Computer Science student specializing in backend-heavy full-stack systems. Strong focus on building scalable web applications using Django and modern JavaScript stacks. Experienced in inventory systems, automated invoicing, and AI-based security platforms with real-time monitoring and logging systems. Seeking backend or full-stack engineering internship.

EDUCATION

B.Sc. Computer Science

Graduated 2026

CHI for Engineering, Computer Science and Management, Cairo

TECHNICAL PROJECTS

Smart Access & Monitoring System (Graduation Project)

2025–Present

- Built AI-based campus security system for face recognition, access control, and attendance tracking
- Developed backend services for logs, alerts, blacklist detection, and real-time access decisions
- Designed modular architecture for future integration with computer vision pipeline and admin dashboard
- Technologies: Node.js, Express, REST APIs, system design (MongoDB-ready architecture)

Inventory & Invoicing System

- Built full-stack inventory management system with automated invoice generation and stock tracking
- Implemented PDF invoice generation, QR code product linking, and real-time pricing logic
- Designed responsive UI with optimized search and AJAX-based interactions
- Technologies: Django, Python, PostgreSQL, JavaScript, Tailwind CSS

SKILLS

Languages: Python, JavaScript, SQL, Java, C++,

Backend: Django, Node.js, Express, REST APIs

Frontend: HTML, CSS, Tailwind CSS, React.js

Databases: PostgreSQL, MongoDB

Tools: Git, GitHub, AJAX, Select2, QR Code generation, PDF generation

LANGUAGES

Arabic (Native), English (Fluent)
