

Youssef Samir Refky

Full-Stack Software Engineer | Backend & Security-Focused Developer

Cairo, Egypt

+20 109 526 2732 | youssefrefky66@gmail.com

LinkedIn | GitHub

Professional Summary

Backend-focused Full-Stack Engineer experienced in building scalable web applications, automation systems, and security-oriented platforms. Skilled in Django, Node.js, PostgreSQL, REST APIs, and system architecture. Built AI-powered access control and real-time monitoring solutions with logging and alerting capabilities. Expanding expertise in Blue Team cybersecurity, secure backend development, SIEM fundamentals, incident response, and threat detection. Seeking Backend, Full-Stack, DevOps, or Security Engineering internship opportunities.

Education

Bachelor of Science in Computer Science

Expected 2027

CHI for Engineering, Computer Science & Management, Cairo

Technical Projects

Smart Access & Monitoring System (Graduation Project)

2025 – Present

- Developed an AI-powered campus security platform for face recognition, access control, attendance tracking, and monitoring.
- Built backend services for authentication, access decision workflows, logging, alert management, and blacklist detection.
- Designed scalable RESTful APIs supporting real-time event processing and future computer vision integrations.
- Implemented modular architecture allowing independent AI, backend, and dashboard components.
- Technologies: Node.js, Express.js, REST APIs, System Design, Authentication, Event Logging.

Inventory & Invoicing Management System

- Built a full-stack inventory management platform supporting product tracking, stock management, and invoicing workflows.
- Developed automated PDF invoice generation with dynamic pricing, discount handling, and customer records.
- Implemented QR-code product linking, responsive dashboards, and AJAX-powered interactions.
- Designed relational database structure optimized for inventory operations and reporting.
- Technologies: Django, Python, PostgreSQL, JavaScript, Tailwind CSS.

Technical Skills

Programming Languages

Python, JavaScript, SQL, Java, C, C++

Backend Development

Django, Node.js, Express.js, REST APIs, Authentication, Authorization, API Security, Modular Architecture, Real-Time Logging, Event-Driven Systems

Frontend Development

React.js, Next.js, Tailwind CSS, HTML5, CSS3, Responsive Design, Component-Based UI

Databases

PostgreSQL, MongoDB, SQLite, Database Design, Query Optimization, Indexing

DevOps & Deployment

Docker, Jenkins, Kubernetes, Nginx, Linux, CI/CD Pipelines, Vercel, Railway, Render

Cybersecurity (Blue Team)

SIEM Fundamentals, Log Analysis, Threat Detection, Incident Response Basics, Security Monitoring, OWASP Top 10 Mitigation, Secure Backend Development

Tools & Technologies

Git, GitHub, Postman, JWT, WebSockets, Celery, Async Tasks, Background Jobs, Linux Terminal

Languages

- Arabic (Native)
- English (Fluent)
